

THE SALZBURG FESTIVAL 2019

The Salzburg Festival is now going into its 99th season and its magnetic impact is greater than ever. What is the secret of this festival? What is the basis for its special charm and success? In a city that has preserved its baroque architecture in almost perfect condition and therefore is a breathtaking backdrop in itself, the Salzburg Festival presents performances of opera, drama and concerts of the highest artistic standards over a period of about six weeks each summer.

Conductors, stage-directors, orchestras, singers, actors and virtuoso instrumentalists of world renown can be seen and heard in July and August in the town on the river Salzach. Even the most eminent opera stars come together here to rehearse productions intensively for several weeks, thereby fulfilling the creed of the Salzburg Festival as it was originally envisioned by Hugo von Hofmannsthal, one of the Festival's founding fathers: "Dramatic play-acting in the strongest sense is our intention; routine, run-of-the-mill performances have no place here."

So every summer in Salzburg, the boundaries between daily life and stagecraft become blurred and the Salzburg Festival offers a more comprehensive program than any other festival - from Mozart to modernism, from classical interpretations to theatrical experiments, one aspect always remains the main focus: quality.
